I'm a Senior Software Engineer working remotely in the last years for startups. I sold a webhosting company at 21 years old. I practice Jiu Jitsu and my number one value is getting things done.

Education

2010 - 2015

Faculty of Engineering, University of Porto.
Master in Informatics and Computing
Engineering

Skills

Backend development and infrastructure automation in the context of microservices with event sourcing

Full-stack development of web apps with React and Typescript

Software Architecture and Tests

Python is my strongest language

Leadership

Data Engineering

Relevant Experience

Mar 2021 - Present

Full-stack, NBX

I've joined as backend and turned full-stack.
Microservices with Kafka, Python and React on the app.

Dec 2020 - Feb 2021: Failed startup co-funding

Mar 2019 - Dec 2020

Backend, Beyond Pricing

Development and Data Engineering of the platform with Python, Django and Postgres.

Sep 2017 - Mar 2019

Backend, Talkdesk

Development of microservices for handling inbound calls with Ruby, RabbitMQ and MongoDB. Development of a new realtime data platform with Elixir and SSE.

Jul 2015 - Aug 2017

Backend and Infrastructure, NDrive

Backend development of microservices with Ruby on Rails, Go, Postgres and Redis. Migrated alone all infrastructure to Docker, Ansible and Grafana+InfluxDB monitoring. Load testing with Locust.
